

# SUNVISION 400 series

## SunVision 400 Series

Technological developments proceed at a furious pace. People want to keep moving. The market demands increasingly more and especially, better solutions. Resulting in: the new SunVision 400! The SunVision 400 series forms the ultimate combination of careful design, advanced tanning technology, high-quality engineering, luxury and, of course, optimum performance. The SunVision 400 guarantees absolute quality, unwavering perfection, maximum safety and continuity, and outstanding value for money with optimal operating yield.

The SunVision 400 is standardly equipped with all the desired comforts. The Body Cooler, for example, can be continuously adjusted, the electronic controls are easy to operate and the ergonomic, specially designed acrylic sheet and the ergonomic UV-permeable pillow give optimum comfort when in a resting position. The perfectly balanced 'EasyTip®' gas pressure dampers make the canopy a featherweight to handle, and user comfort is made complete by the ideal height for stepping into the tanning bed and its spacious opening area. The professional 200-cm long 120-Watt lamps in the bench, the powerful face tanners, the perfect tunnel shape and the lamps positioned close to the body all guarantee exceptional tanning results. In addition, the ingenious cooling system with central exhaust ensures optimum UV penetration and maximum effective life of the lamps. Because all the electrical components are mounted directly behind the easy-to-open front lid, they are optimally accessible even in the smallest cabin. This unparalleled service-friendliness makes maintenance fast and easy.

SunVision 466 XXL TrueTan Power Focus 160 Watt  
18 x 160 Watt Professional reflector tubes (canopy)  
18 x 120 Watt Professional 2 meter reflector  
tubes (bed)
