

SunVision 500

Intelligent Tanning

With the SunVision 500 series, Alisun introduces a new line of high-end sunbeds which meet all requirements. Your customers will immediately appreciate the luxurious finish and the immense comfort of the 500 series.

The 500 series is available in 3 expressive metallic colours and can be fitted with several custom-made airbrush designs or a (company) logo. The 500 series has a filtered central air extractor system and a powerful, whisper-silent cooling system.

The moveable Body Cooler Unit – for a vitalising air massage - and the unique, ergonomically shaped acrylic sheet - which guarantees an incomparable reclining position - are both included as standard. The optional Intelligent Cooling System (ICS®) allows the temperature of the acrylic sheet of the bed and the tubes to be controlled electronically.

SunVision 560

42 x reflector tubes:
