

# SUNVISION 600

The 600 series distinguishes itself by the company's New Basic design rounded monolithic shapes. For accent, you may choose from 4 delightful metallic colour combinations which give it a stylish, powerful look. The 600 series is a leading trend-setter when it comes to applied technology, design and comfort. Well-considered, stylish looks and superior user-friendliness will win over even your most demanding clients. State-of-the-art technology is now producing previously unheard-of tanning results. All this plus an easy-to-read unique cockpit display, pleasant body cooling and a modern music system. Anyone using it can't go back to anything else!

These spacious tanning tunnels - with no fewer than 49 reflector tubes - make tanning in the 600 series a true tanning experience! And, you can choose from four TrueTan(TTâ) facial tanners or a Soft Intensive System (SISâ ) face tanner. A shoulder tanner is standard. Our now famous Intelligent Cooling System (ICS®), developed especially by Alisun, is standard equipment on all tanners in the 600 series. ICS not only provides quiet-as-a-whisper cooling, but also warms up quicker for even greater user comfort. Loudspeakers, air conditioning and a central air exhaust with heat recovery system are available as options. temperature of the acrylic sheet of the bed and the tubes to be controlled electronically.
